Reason for the Report

1. To confirm parkland to be held under the Local Government Act 2002 (LGA) and make decisions on the classification and reclassification of reserve land held under the Reserves Act 1977 (RA).

Executive Summary

2. As part of the development of the Tararua Reserve Management Plan under the Reserves Act 1977, classification decisions are needed for some parks and reserves in the Tararua District to address:
   - acquisitions of new reserve land,
   - technical advice that some parks require reclassification to better reflect park values and current and future use,
   - reserves identified as unclassified.
3. Classification of reserves is a statutory requirement for all land held under the Reserves Act 1977, and an essential task in developing a reserves management plan for the Tararua District that complies with the Reserves Act.
4. Our classification investigation included the review of 197 parcels of land owned by Tararua District Council (the Council) held under the Reserves Act 1977 and 21 parcels of land held under the Local Government Act 2002.
5. Staff have considered the advantages and disadvantages of the Reserves Act 1977 or Local Government Act 2002 in managing and enabling the use, protection and development of each park or reserve and developed a set of criteria to guide the assessment of each land parcel.
6. Public notification is required for some parcels of land as part of the classification process. Staff recommend that the Council approve classifying land parcels that don't require public notification and notifying the reclassification of other land parcels as outlined in this report.
7. Completing the reserve classification and reclassification processes will enable staff to complete preparation of the draft Tararua Reserve Management Plan for public notification.
8. A summary of the classification actions proposed in this report is provided Table 1 below.

Table 1: Proposed actions for 184 land parcels requiring a decision

	Proposed Action	No. of land parcels	Relevant section of the Reserves Act 1977	For a list of parcels refer to:
	Retain under the LGA	25	Not applicable	Attachment B

Options for land held under the LGA	Declare and classify (with public notification)[1]	3	s.14(2)	Attachment C
	Total	**28**		
Options for land held under the Reserves Act	Classify (without public notification)	152	s.16(1), s. 16(2A)	Attachment D
	Reclassify (public notification required)	3	s.24(2)(b)	Attachment E
	Total	**155**		
	Total land parcels requiring a decision	**183**		

Recommendations

That the Council:

a) confirm 25 parcels of land that will continue to be held under the Local Government Act 2002 as described in Attachment B of this report.

b) approve public notification of the proposal to declare and classify 3 parcels of land according to their primary purpose, pursuant to section 14(2) of the Reserves Act 1977 as described in Attachment C of this report.

c) approve the classification of 152 parcels of reserve land pursuant to sections 16(1) and 16(2A) of the Reserves Act 1977, as described in Attachment D of this report.

d) approve public notification of the proposal to reclassify 3 parcels of reserve land pursuant to section 24(2)(b) of the Reserves Act 1977, as described in Attachment E of this report.

Context

9. The Tararua District Council (the Council) has delegated decision-making responsibility for 110 reserves comprised of 330 land parcels across the District.

10. The Reserve Management Plan will be a statutory document prepared in accordance with section 41 of the Reserves Act 1977 (RA). It will cover all reserve land held under the RA, parkland held under the Local Government Act 2002 (LGA), and replace existing Reserve Management Plans.

[1] Public notification is required under section 14(2) of the RA as the land parcels are not zoned or designated for as open space purposes under the Tararua District Plan; therefore, not meeting the public notification exemption under section 14(1) of the RA.

Background

11. In January 2024, staff completed a comprehensive land status investigation for all park and reserve land in the Tararua District. This is a statutory requirement under the RA and an essential preliminary task in developing the draft reserves management plan. Section 16 of the RA requires all land held as reserve under the RA be classified appropriately.

12. As part of this investigation, staff identified a number of land parcels that required action, to ensure compliance with the RA.

13. The Council has delegated decision-making responsibility to make decisions the required actions.

Classification options depend on the legislation which land is held under

14. The Council has the option to hold parks under the LGA or the RA. Attachment A provides an overview of the different options for land held under the LGA and land held under the RA.

LGA Options

15. For land held under the LGA Council has the following options:

a) continue to retain the land under the LGA, or

b) declare land currently held under the LGA to be reserved under section 14 of the RA and classify it appropriately.

RA Options

16. For land held under the RA, the following options have been considered:

a) classify according to the land's primary purpose

b) reclassify to align to the land's primary purpose

c) revoke the reserve status and hold the land under the LGA

d) continue to hold the land as unclassified reserve under the RA.

17. Considerations associated with the decision to retain land under the LGA or declare and classify reserves under the RA include:

a) current and likely future use

b) continuity with adjoining land parcels

c) benefits and constraints of legislation.

Analysis and advice

18. Staff have considered the advantages and disadvantages of the RA or LGA in managing and enabling the use, protection and development of each park or reserve, and developed a set of criteria to guide assessment of each land parcel.

19. The following criteria from the Reserve Act Guide has been used to inform proposed classification [2] as follows:

a) consideration of the reserve's values

b) current and likely future use of the reserve

c) consultation with subject matter experts

d) workshop feedback from the Council

e) consultation with mana whenua.

20. The option to continue to hold the land as unclassified reserve under the RA (section 19a) has been discounted as it would mean that the reserves management plan would not comply with the RA or meet the statutory obligation under the Act to classify land before notifying a draft plan.

21. In the context of this investigation, we have not identified any parcels of local park that warrant revocation of reserve status to pursue management of the local park under the LGA.

22. In considering whether to proceed with the options for each land parcel, staff have considered the following criteria:

a) Why does the Council own the land and how was it acquired? For example, the land may have been vested as recreation or esplanade reserve following completion of a subdivision.

b) What is the current and likely future purpose (primary purpose) of the land?

c) What potential does the land have for protection, enhancement, and development?

d) Is there likely to be a need to retain flexibility for future use of the park or reserve?

e) What is the status of adjacent parcels of land within the same park or reserve?

23. Informed by the criteria above (section 22), the following sections outline classification proposals for land held under the LGA or the RA.

Proposed actions for land currently held under the LGA

Proposal to retain 25 parcels of land under the LGA (Attachment B)

[2] Local Government New Zealand and Department of Conservation (n.d), Reserves Act Guide, retrieved from https://www.doc.govt.nz/Documents/about-doc/role/legislation/reserves-act-guide.pdf

24. In applying the criteria above, 25 parcels of land have been identified as best suited to remain under the LGA (Attachment B). This is primarily because either the current use does not align with any of the classification options in the RA, and/or there is a likely need to retain flexibility in how it is used or managed in the future. Bush Park in Pahiatua is an example of where this occurs.

25. No further action is required by the Council for land that is to remain under the LGA.

Proposal to declare and classify 3 parcels of land held under the LGA (Attachment C)

26. Staff recommend that 3 parcels of land currently held under the LGA, should be declared as reserve under section 14(1) of the RA and classified to align with their primary purpose (Attachment C). Public notification is required under section 14(2) of the RA as the land parcels are not zoned as open space or designated for recreation purposes under the Tararua District Plan; therefore, they do not meet the public notification exemption under section 14(2) of the RA.

Proposed actions for land currently held under the RA

Classification of 152 parcels of land currently held under the RA (Attachment D)

27. Classification involves determining the reserve's primary purpose or values, then assigning a classification to the reserve (or part of a reserve), as defined in sections 17 to 23 of the RA. Consideration is also given to potential future values and activities and uses.

28. Staff have identified 152 parcels of unclassified reserve land that require classification under section 16(1) and 16(2A) of the RA (see Attachment D). These proposals do not require public notification under the RA, as all proposed classifications are substantially the same as the purpose the land was held for before the commencement of the Reserves Act in 1977.

Reclassification of 3 parcels of land held under the RA (Attachment E)

29. Reclassification involves assigning a different classification to a reserve (or part of a reserve) to better cater for its primary purpose.

30. During this investigation, 3 parcels of classified reserve land were identified as requiring reclassification (Attachment E) for the following reasons:

a) to better align with the current or anticipated future use of the reserve, or

b) to correct previous classification errors such as clarifying whether land held as scenic has 1a or 1b status under the RA.

31. Section 24(2)(b) of the RA requires all proposals to reclassify reserves to be publicly notified, together with the reasons for the proposed change in classification.

Summary of proposed Tararua District Parks and Reserves Land Classification Programme

35. Scenic Reserve is the most proposed classification, this is largely due to the 71 parcels of land that form the Pongaroa Scenic Reserve. Scenic 1a or 1b reserve classifications (under section 19 of the RA) are proposed for sites that are recognised as sites of ecological significance or over time will develop these qualities.

36. 21 of the 23 proposed Local Purpose classifications are Local purpose (esplanade) reserves. Esplanade reserves are held for the purpose of contributing to the protection of conservation values, enabling public access and/or enabling recreational use of land and adjacent water bodies. Akito Foreshore Reserve is an example of where this classification is proposed to protect the natural values of the coastal fringe and remaining dune system.

37. Other proposed classifications include 24 Recreation reserves, one Local purpose (community building) reserve, one local purpose (plantation) reserve and two local purpose (accessway) reserves.

Council group impacts and views

38. These land classification proposals have been developed in consultation with Council Units including, Community Facilities, Planning Services among others.

39. Staff note that the Reserves Management Plan will provide a consistent management direction for all parks and reserves regardless of whether land is managed under the RA or LGA.

Local impacts and Council views

40. At a workshop on 31 October 2023, staff presented principles underpinning this classification investigation to elected members and provided an overview of a selection of classification proposals for discussion.

45. The Council was generally supportive of the principles underpinning classification and of the proposals put forward for discussion.

Māori impact statement

46. Councils iwi partners, Ngāti Kahungunu and Rangitāne, were offered the opportunity to meet with staff to discuss classification further and to view the full list of parcels proposed for decision and inviting further feedback on any of the proposals.

47. Staff held workshops with each iwi taiao teams in August and November 2024. At these hui Staff presented the principles underpinning the classification investigation and provided an overview of a selection of proposals for discussion. Proposals selected included examples of variety of different classification types, sites staff thought were likely to have Iwi interest and other sites Iwi representatives suggested at the hui.

48. Iwi representatives were sent the full suite of classification proposals to review and provide feedback on. Staff responded to a small number of queries mostly clarifying if certain activities were permitted under certain classifications and in late January 2025 both iwi confirmed support for all proposed classifications without any recommended changes.

Financial Implications

49. This report has no significant financial implications for the Council. The costs for public notices and gazette notices for the classifications will be covered through existing departmental budgets.

Risks and mitigations

50. The following table outlines relevant risks and mitigations associated with the proposed actions for land held under the LGA and RA contained in this report.

Table 2 risks and mitigations associated with the proposed actions for land held under the LGA and RA

Risk	Risk level	Mitigation
IF land is held under the LGA **THEN there may be a perception that the land is at risk of sale or disposal.**	Low	There are restrictions on disposal of parks under section 138 of the LGA and the requirement to undertake consultation, including prior to granting leases for more than six months.
IF land is classified under the RA **THEN this constrains what the land can be used for.**	Low	Each individual parcel proposed to be held under the RA has been assessed based on the criteria in paragraph 15 and the Reserves Act Guide (see footnote 2). Recommendations reflect current and likely future use of each individual parcel and do not add additional restrictions.
IF public objections to proposed classifications are received **THIS will affect the public notification timeline for developing the Draft Reserves Management Plan.**	Low	Six parcels require public notification and if any objections are received these can be considered before a decision on notification of the Draft reserves Management Plan.
IF land is classified as Scenic 1a or 1b **THEN this places greater responsibility on the Council to deliver environmental outcomes which it may not be resourced to deliver.**	Low	Council units responsible for restoration and enhancement of the natural environment are supportive of the scenic classifications proposed and council staff will work together with the community to deliver these outcomes.

Next steps

51. If the recommended classification actions are approved, the next steps are to:

a) publish a notice in the local newspaper for the parcels requiring public notification (for at least one calendar month)

b) report back to the Council to outline any submissions and advise further on the classification proposals and seek further approval/confirmation if necessary

c) arrange gazette notices for approved classifications. Approval of gazette notices has been delegated from the Minister of Conservation to the General Manager Community Facilities

d) reflect updates to the classifications in the Draft Tararua Reserves Management Plan

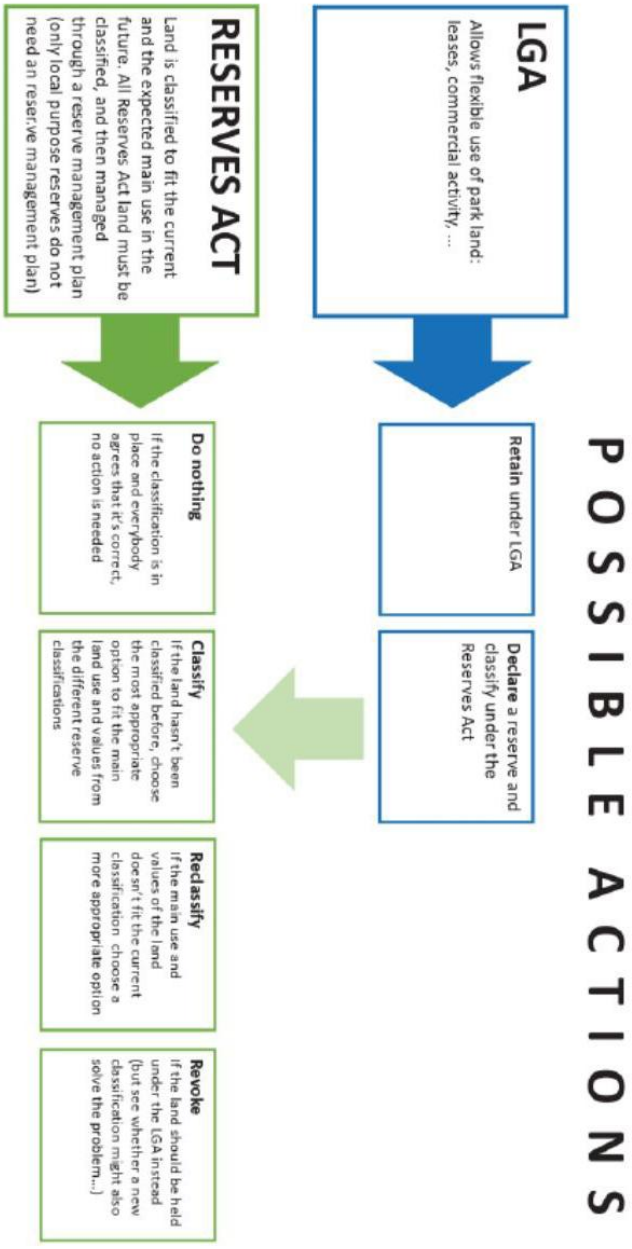

e) ensure all classifications are correctly recorded on Council's databases.
